OBJECTIVE

A Computer Science student and Frontend Developer with experience in JavaScript, React.js, React Native, SQL, MongoDB, and modern web technologies, along with a strong foundation in Data Structures, Algorithms, and system design fundamentals. Skilled at building scalable and responsive applications, optimizing performance, and working with component-based architectures. Passionate about learning new technologies and continuously improving to stay ahead in the ever-evolving field of software development.

EDUCATION

Bachelor of Science in Computer Science, National University of Computer and Emerging Sciences 2023 - 2027
Relevant Coursework: Object-Oriented Programming, Data Structures and Algorithms, Database Management Systems, Computer Networking, Operating Systems, and Artificial Intelligence.

PROFESSIONAL SKILLS

Programming Languages	JavaScript, Python, C++, SQL, HTML/CSS, x86 Assembly
Frontend Technologies	React.js, React Native, Tailwind CSS, Bootstrap, Figma
Backend Technologies	Node.js, Express.js, RESTful APIs, SQL, MongoDB
AI/ML	RAG, LangChain, LLM Integration, Prompt Engineering, FAISS Embeddings, Recommendation Systems, K-means, ANN, MediaPipe
Tools	Git, GitHub, VS Code, MySQL Workbench, MS Excel (Advanced)
Soft Skills	Problem-Solving, Communication, Team Collaboration, Adaptability

WORK EXPERIENCE

React Developer Intern Amrood Labs (Pvt) Ltd	June 2025 – August 2025 <i>Lahore, Pakistan</i>
--	--

Developed frontend features using React.js, JavaScript (ES6), HTML, CSS, and Tailwind CSS, building responsive interfaces with component-based architecture and state management, and contributing to Agile workflows through code reviews and team collaboration to maintain clean, structured, and efficient code.

PROJECTS

- Recruitment Management System**) Full-stack recruitment system built with React.js, Node.js, Express.js, and MongoDB, enabling job applications, resume uploads, and application tracking, with HR-side management of postings, applicants, and interviews, integrated with Cloudinary for file handling and Gmail SMTP for email notifications.
- Banking Management System** Banking system developed with MySQL (SQL) for handling accounts, transactions, and loans, using stored procedures and triggers, along with a simple admin panel in HTML, CSS, and JavaScript.
- Social Media Platform** A C++ based system combining hash tables, graphs, linked lists, stacks, queues, and AVL trees to handle user management, friendships, posts, messaging, notifications, and ranking features in one fully integrated application.
- AI Movie Recommendation System** Python-based movie recommendation system using Recommendation Systems, K-means clustering, and Neural Networks (ANN) to generate ranked suggestions from user preferences, with constraint filtering (CSP) and a Streamlit interface, leveraging NumPy, Pandas, and Scikit-learn.
- PhantomTrace (Hand Tracking AR)** Browser-based augmented reality application using JavaScript and Computer Vision (MediaPipe Hands) for real-time hand tracking and gesture interaction, implementing air drawing, gesture recognition (pinch, fist), dynamic visuals with HTML5 Canvas, and interactive audio using Web Audio API.
